	Street: 1515 Cincinnati Street	
	City: Dayton	State: OH
	Zip:	
	Phone: (937) 455-5825	
	Speed Dial No:	

SUBJECT: Drinking water wells at Delphi Automotive Systems Plant

### CONVERSATION SUMMARY

I telephoned Ms. Avery to confirm drinking water supply information for the Delphi plant provided by the Ohio Environmental Protection Agency (OEPA). Ms. Avery indicated that two wells are operational at the plant and are primarily used for process water; however, water from the on-site wells also provides drinking water to the 220 employees at the plant. Both wells are screened between 185 and 189 feet below ground surface, in the alluvium of the Great Miami River.

Ms. Avery indicated that the population of 650 provided by OEPA is out of date because it included employees previously employed in another section of the plant along Wisconsin Boulevard that has since been closed and demolished. Ms. Avery indicated that the current address of the plant is 1515 Cincinnati Street in Dayton, OH.
